Jeannette, Sunroad is scheduled to present their PDP for the 600 remaining residential entitlements in Centrum for information only. That PDP has been submitted to Development Services for processing. We will not be taking any action. I believe that you will find our group very supportive of any efforts to relocate the SDG&E substation to the office portions of the Sunroad site or some other non residential location. I would not like to cancel Sunroad presentation today as their architect from LA and that support staff is here to do the presentation. We are all aware of the issue with the substation. Buzz Gibbs

I gues I had your address wrong, here is the e-mail

Buzz,
The City is currently in the process of meeting with Sunroad and SDG&E regarding the substation relocation at the Spectrum site. We would therefore appreciate it if your planning group postponed any informational items and any votes on projects that are in the Spectrum property for at least one month.
Thank you,
Jeannette Temple
