OK. Where are we on this now? I had been avoiding becoming involved because Gary and Tait were the experts. I guess I now must endeavor to learn more. My basic understanding is that these sites are not in our mapped AEOZ. Not sure how that came to be but we issued permits based on what was legally adopted and shown in our M.C. Not certain what sections of the code cover public nuisance other than what I have in Chap 14, because you'd need something in my view that dealt with public safety. K

>>> David Miller 8/7/06 1:28 PM >>>

Did you get my last email regarding stopping the construction of this project based on a public nuisance theory?

Also, why is there not an airport approach overlay zone for airports other than Lindbergh?

Let's talk.
